

Italian is offered to first grade through fourth grade. Our school sees the importance of introducing our young students to learning about other cultures and languages. Students at St. Joseph school will learn Spanish from fifth through eighth grade. Exposure to these two languages will allow our students to learn about cultures other than their own. Some of the topics covered through the four years of Italian are:

- Daily activities
- Days, months, dates, and time
- Famous sites found in Italy
- Foods and drinks
- How to greet people as entering or leaving a room
- Numbers
- Seasons and weather
- Colors

These topics are taught through engaging activities such as games, acting out different scenarios where they need to use the Italian vocabulary and worksheets. The goal is to make learning another language fun and interesting, so they develop an interest about other people and their cultures. We are living in a global environment and learning another language will assist them in their future.
